Current address: Dhaka Bashundhara, Block C
Road 4 House 127 Flat 6A.

WORK EXPERIENCE

Shadhin Music Ltd - (Gakk Media Ltd)

Software Developer (Frontend)

October 2022 to Present

- Implemented various features like **stream & win campaign, playlist, payment, authentication** of **Shadhin** which is currently number one audio platform of Bangladesh.
- Restructured the project and refactored old unmaintainable codes to readable, maintainable and clean code. Increased performance by decreasing initial loading time.
- Build a report management system from scratch for viewing various kind of data report using **React** which is used by telecommunication clients (Banglalink, GP, Robi).
- Developed VAS services and updated features as per client need.
- Helped and guided junior teammates.

Hashcode

Software Developer

January 2022 to September 2022

- Developed and maintained web and mobile applications using JavaScript, React, React Native and Node.js.
- Collaborated with cross-functional teams to design and implement new features Resolved performance issues for different client products.
- Converted figma design to functional components as per project requirement.

Astha.IT

Software Engineering Intern

July 2021 to October 2021

- I was one of the selected trainees among many fresh graduates for having training on different stacks of software development by the industry experts.
- Got training on Javascript , Next JS , C# , Git

EDUCATION

Islamic University Of Technology (IUT)

BSc in Software Engineering (January 2018 - June 2022)

Govt. Azizul Haque College Bogura

HSC (2014-2016)

Bogura Cantonment Public School & College

SSC (2014)

SKILLS

Programming Language

- JavaScript, Typescript

Frontend Technologies

- Next.js, React, React native, Redux, Zustand, Tailwind,CSS, HTML

Backend Technologies (familiar with)

- Node, Express.js , MongoDB

Tools

- Git, Gitlab, Github, VS Code, Postman, Figma

PROJECTS

* live link attached with project title

* more works can be found on my [portfolio](#)

Shadhin

- **Optimized performance:** Implementation of advanced client-side caching techniques for reducing page load times and enhancing user experience.
- **Codebase restructuring:** Led a full-scale refactor of an outdated, unmaintainable codebase, transforming it into a modular and scalable architecture. Applied design patterns to enable future scalability, maintainability, and improved collaboration across teams.
- Leading to a 30% improvement in developer productivity and smoother feature rollouts.

Win

- Contributed to the frontend development, collaborating with designers, backend developers, and stakeholders to deliver a seamless user interface.
- Introduced efficient state management practices using Redux, reducing application state bugs by 20% and improving performance across key user flows.

Docuware (Demo)

- Developed document drawing functionality within the DocuWare platform to build interactive and user-friendly drawing tools.
- Designed and implemented complex document annotation features, including drawing, highlighting, and editing, significantly enhancing user interactivity with documents.
- Collaborated with cross-functional teams to ensure smooth integration, high performance, and a user-friendly interface for the document drawing features
- **Next js** and **typescript** is used as tech stack
